About Our ASC

The Center for Outpatient Surgery (COPS) is designed, equipped and staffed exclusively for outpatient surgery. COPS exceeds the highest standards required by the state of California. As compared to a hospital, COPS provides greater convenience in a more relaxed atmosphere.

COPS enables patients to be discharged within a few hours after surgery to recuperate in the comfort of their own home. COPS is a multi-specialty Ambulatory Surgery Center (ASC) that has been in operation since 1998 and is state-licensed, Medicare-certified, and accredited by the Accreditation Association for Ambulatory Health Care.

Assuring Your Privacy, Safety and Comfort

COPS has been designed with your privacy, safety and comfort in mind. We recognize that time away from your family and job is an inconvenience. Our waiting room is a comfortable room for your family and friends. Our five fully-equipped operating and procedure rooms enable us to minimize your time at our facility, while providing the latest surgical technology to your surgeon.

Day of Surgery

Upon arrival at COPS, you will need to bring:

- Identification/Driver's license
- Insurance cards
- Cash, check or credit card

Please leave all other valuables at home.

Our Commitment to You

Our goal is to provide the finest care possible at reasonable costs to you. Our commitment to you continues after surgery. One of our caring staff will call you the day after surgery to ask how well you are doing.

The finest surgical instruments and medical technology are available at COPS to enable your specialist to perform a wide variety of outpatient surgical procedures. Fluoroscopy and X-ray are also readily available.

About Our Staff

Many different specialists make use of COPS including Ophthalmologists, Gastroenterologists, Pain Management Specialists, Podiatrists, Orthopedic Surgeons, and Ocular Plastic Surgeons. Your surgeon is further supported by our MD anesthesiologists and a skilled nursing staff, specially trained in outpatient surgery and patient care.
